FOREWORD

Since 1939, **Commodity Year Book** has been known as "the Bible of the commodity trades." It earned this distinction by (among other things) presenting each year the most extensive, thorough and accurate compilation of commodity information available from both public and private sources. The **Year Book** is widely used by industry, government agencies, university and special libraries, as well as leading brokerage firms and banking institutions.

However, **Commodity Year Book** has had one failing. Like all annuals, it is completely current only at the time of publication. While it continues to be invaluable for background information, it cannot be used alone as a single fast reference source by those seeking up-to-date information later in the year.

This need is met through the **Commodity Year Book Statistical Abstract Service**, three times-yearly publication which presents the latest information available to update the wealth of data presented in the **Year Book**. The **Abstract** is compiled and edited by the staff of Commodity Research Bureau, Inc., one of the world's leading commodity research organizations. Each issue consists of three sections.

Section I contains approximately 400 updated tables corresponding to the monthly tables found in **Commodity Year Book**. Each Table in the **Abstract** shows the latest statistical data available, plus the data for at least one preceding year. Commodities are listed alphabetically. Within each commodity section, tables are arranged to follow the Year Book format. The numerals following each commodity title in the **Abstract** refer to the pages where information on that commodity may be found in **Commodity Year Book.** All tables in Section I are updated with the latest available information in each issue of **Commodity Year Book Statistical Abstract Service.**

Section II presents all annual tables in which there have been significant statistical changes since the publication of **Commodity Year Book.** Each table in the **Abstract** shows the most recent statistical data available, plus the data for at least one preceding year. Commodities are listed alphabetically. Within each commodity section, tables are arranged to follow the Year Book format.

Section III contains more than 20 cash price charts, for that many selected commodities. These charts are plotted on a monthly basis and cover about 10 years of activity. They too, are updated for each issue of the **Abstract.**

The Abstract is of greatest value when used in conjunction with **Commodity Year Book,** the basic data book which has complete footnote explanations. This combination, by providing both historical and current data, is an invaluable working tool for all who are seriously concerned with commodities.

SECTION I

ALCOHOL (41)

AVERAGE WHOLESALE PRICE INDEX OF ETHYL ALCOHOL, IN N.Y. Dec. 1973=100

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Average

FOREWORD

Since 1939, **Commodity Year Book** has been known as "the Bible of the commodity trades." It earned this distinction by (among other things) presenting each year the most extensive, thorough and accurate compilation of commodity information available from both public and private sources. The **Year Book** is widely used by industry, government agencies, university and special libraries, as well as leading brokerage firms and banking institutions.

However, **Commodity Year Book** has had one failing. Like all annuals, it is completely current only at the time of publication. While it continues to be invaluable for background information, it cannot be used alone as a single fast reference source by those seeking up-to-date information later in the year.

This need is met through the **Commodity Year Book Statistical Abstract Service**, three times-yearly publication which presents the latest information available to update the wealth of data presented in the **Year Book.** The **Abstract** is compiled and edited by the staff of Commodity Research Bureau, Inc., one of the world's leading commodity research organizations. Each issue consists of three sections.

Section I contains approximately 400 updated tables corresponding to the monthly tables found in **Commodity Year Book.** Each Table in the **Abstract** shows the latest statistical data available, plus the data for at least one preceding year. Commodities are listed alphabetically. Within each commodity section, tables are arranged to follow the Year Book format. The numerals following each commodity title in the **Abstract** refer to the pages where information on that commodity may be found in **Commodity Year Book.** All tables in Section I are updated with the latest available information in each issue of **Commodity Year Book Statistical Abstract Service.**

Section II presents all annual tables in which there have been significant statistical changes since the publication of **Commodity Year Book.** Each table in the **Abstract** shows the most recent statistical data available, plus the data for at least one preceding year. Commodities are listed alphabetically. Within each commodity section, tables are arranged to follow the Year Book format.

Section III contains more than 20 cash price charts, for that many selected commodities. These charts are plotted on a monthly basis and cover about 10 years of activity. They too, are updated for each issue of the **Abstract.**

The Abstract is of greatest value when used in conjunction with **Commodity Year Book,** the basic data book which has complete footnote explanations. This combination, by providing both historical and current data, is an invaluable working tool for all who are seriously concerned with commodities.

SECTION I

ALCOHOL (41)

AVERAGE WHOLESALE PRICE INDEX OF ETHYL ALCOHOL, IN N.Y. Dec. 1973=100

FOREWORD

Since 1939, **Commodity Year Book** has been known as "the Bible of the commodity trades." It earned this distinction by (among other things) presenting each year the most extensive, thorough and accurate compilation of commodity information available from both public and private sources. The **Year Book** is widely used by industry, government agencies, university and special libraries, as well as leading brokerage firms and banking institutions.

However, **Commodity Year Book** has had one failing. Like all annuals, it is completely current only at the time of publication. While it continues to be invaluable for background information, it cannot be used alone as a single fast reference source by those seeking up-to-date information later in the year.

This need is met through the **Commodity Year Book Statistical Abstract Service**, three-times-yearly publication which presents the latest information available to update the wealth of data presented in the **Year Book**. The **Abstract** is compiled and edited by the staff of Commodity Research Bureau, Inc., one of the world's leading commodity research organizations. Each issue consists of three sections.

Section I contains approximately 400 updated tables corresponding to the monthly tables found in **Commodity Year Book**. Each Table in the **Abstract** shows the latest statistical data available, plus the data for at least one preceding year. Commodities are listed alphabetically. Within each commodity section, tables are arranged to follow the Year Book format. The numerals following each commodity title in the **Abstract** refer to the pages where information on that commodity may be found in **Commodity Year Book**. All tables in Section I are updated with the latest available information in each issue of **Commodity Year Book Statistical Abstract Service.**

Section II presents all annual tables in which there have been significant statistical changes since the publication of **Commodity Year Book.** Each table in the **Abstract** shows the most recent statistical data available, plus the data for at least one preceding year. Commodities are listed alphabetically. Within each commodity section, tables are arranged to follow the Year Book format.

Section III contains more than 20 cash price charts, for that many selected commodities. These charts are plotted on a monthly basis and cover about 10 years of activity. They too, are updated for each issue of the **Abstract.**

The Abstract is of greatest value when used in conjunction with **Commodity Year Book,** the basic data book which has complete footnote explanations. This combination, by providing both historical and current data, is an invaluable working tool for all who are seriously concerned with commodities.

SECTION I

ALCOHOL (41)
